

## Fleet Visual Tracking - VTS

- In-Bus Video Recording
- Web Based Centralized Management
- 3G - Live Video Streaming
- 5.8GHZ WiFi Enabled
- Automatic Video Download

### Protect your:

- Students
- Staff
- Buses

School buses security and children's safety are central concerns for **WhiteOwl®**, as much as they are for parents and school administrators everywhere. The Bus operation including staff and students/passengers will be enormously enhanced in sense of efficiency, discipline, safety & security. Daily Video recording of in-bus operation will provide a great positive impact on security/safety process performance, eliminating passengers/students conflicts and allows the driver to focus on driving only.

The system facilitates precise live streaming video and clear vision day and night that help avoiding malicious damage of assets & human injuries. Increase safety/security; minimize the vulnerabilities and give the privilege of powerful management supervisory.

Designed by topnotch experts in the automotive safety field and made of Japanese and American components uses the latest technology especially engineered to crystallize vision under harsh outdoor operations.

### Improve

- Passenger safety
- Student discipline
- Driver efficiency
- Staff behavior
- Decision Making

### Eliminate

- Accidents and Theft
- Damage costs
- Vandalism and destruction of school bus property
- False Legal Claims
