

Vision 360° Truck Trailer Backup Sensors

Drive With Extra 4 Eyes

Vision 360° Truck

Endorse your trailer/trucks safety and operations efficiency by adding extra 4 eyes to your drivers facilitating optimal vision around your vehicles.

Road drivers, labor & obstacles are always surrounding the trailer/truck in areas that are not visible to the driver, these areas called **blind spots**, which would be of a great threat on the driver, trailer and road users' safety. **Vision 360°** puts all the blind spots of the trailer/truck into a clear vision. The monitor allows the driver to see front, back and both sides of the trailer/truck increasing operation efficiency.

Designed by topnotch experts in the automotive safety field and made of Japanese and American components uses the latest technology especially engineered to crystallize vision under harsh outdoor operations.

Improve

- Safety
- Visibility
- Efficiency
- Truck surrounding space utilization

Eliminate

- Blind spots
- Damages
- Accidents
- Driver fatigue
